Attention FCC: With respect to the issue concerning the National Association of Broadcasters v. XF satellite Radio. I am a subscriber to the satellite Radio format, because it is so much better in content and quality than conventional radio. If the Association of Broadcasters wants favors from legislature, and the public, let them compete for it in the market place. I would be happy to listen to their format if they gave me something to listen to. Unfortunately it is my experience that their format is weak and uninteresting. Please don't force others to meet the standards of the mediocre. I pay my own money to listen to this format. Don't side with lobbyists who, at their masters' biddings, dictate something that is less than what can ultimately make Radio great again.
